

Social Dialogue and Safety in the building sites

Improving expertise in the field of industrial relations

Promoting and fostering good practices exchange in the Health and Safety operational and prevention system in the building sector

Budget line 04.03.03.01 – Call for proposal VP/2010/001/0259

C.E. VS/2010/0682

Project aims

The aim of the project is to improve expertise in the field of industrial relations and to realize two training meetings: the former as an introductory and informative stage and the latter as an in-depth and a transmission of tools and strategies of trade union action.

The training is addressed to 30 workers' representatives at company and/or territorial level of the sector and geographic areas (**in Italy, France, Belgium, Germany, Poland and Turkey**) in which accident and occupational diseases phenomena are higher and more relevant.

The project makes possible the consolidation of the expertise and working abilities of H&S. This will represent a benefit for all H&S actors which will use the "new" contribution to develop new organisational and operational abilities.

Methodology for carrying out the project:

1) Preparatory phase

Preparatory meeting (held in Rome on January 26-27, 2011) attended by one representative from each partner. During the meeting it was decided the seminars planning, invitations and participation of materials and documents, share of tasks

2) Principal phase

2 seminars

Istanbul (TR), April 5-7, 2011

Objectives:

- Analyzing and comparing the building sector in the involved countries: enterprises' typology and dimension, statistics regarding different typologies of risks, accidents and professional diseases;
- Analyzing the modalities of institutions and social partners' intervention on H&S matter
- Developing a comparative analysis of the different actors delegated to H&S operation
- Bargaining in the field of Health and Safety
- Making comparisons between the different representation and bilaterality systems on H&S matter

Bruxelles, September, 20-22, 2011

Objectives:

- Comparing the different systems: contractual and operational about information and consultation rights on H&S matter
- Promoting exchange of good practices about intervention on H&S matter and protection of environment
- Information on REACH (2007) regulations;
- Analysis of the operational and prevention systems on H&S in the building enterprises
- Testing of tools for information and communication collection at transnational level on H&S matter.
- The European Social Dialogue in the field of Health and Safety.

3) Follow up phase

Evaluation meeting – attended by one representative from each partner to be held in Warsaw on October 10-11, 2011.

Final evaluation of the 2 seminars outcomes, résumé of the good practises and their spreading through the production of 1000 CDs.
